### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

### DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-6, 8-15, 17-20 and 22-28 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Baba et al. US # 6,232,735.

Baba et al. disclose a robot remote control system by which a robot apparatus can be remotely controlled, (see abstract). The apparatus is provided with a first computer for generating control data of the robot apparatus and transmission device for transmitting control data to a public communications network. The robot image remote control processing system including:

- A remote station including an image remote control portion 5, (see Fig. 3) that comprising earphone and microphone block 40. Wherein it is clear that earphones are part of head worn device;
- A robot apparatus 2, (see Fig. 3) that comprises a head camera, earphone and microphone coupled to image selection portion;
- An interface portion 53;
- An interface portion is presented as “public communications network”, that is also disclosed in applicant’s specification as well known.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 7, 16 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baba et al. US # 6,232,735 and Pin et al. US # 5,374,879.

The limitations of the base claims have been discussed in the rejection paragraph above. Baba et al. do not teach the use of holonomic mobil platform. However, holonomic platforms are well known. Pin et al. teach such platform that includes wheel assembly and a support.

Hence, it has been obvious to one of ordinary skills in the art, at the time invention was made to use Pin et al. holonomic platform in Baba et al. invention to provide for robot mobility.

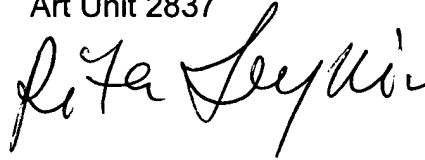

The reason is to achieve required movement in relation to rotational axis of the platform.
